

ZUDIO
APP DESIGN
CONCEPT

DESIGN METHODOLOGY

1. IDENTIFY

User, Market, and Product Study to understand the landscape.

2. DEFINE

Identifying the "Gap" and defining core problem statements.

3. IDEATE

SCAMPER, Brainstorming, and Trigger Words for innovation.

4. PROTOTYPE

Architecture, Tech Stack, and High-Fidelity Visuals.

5. TEST

Heuristic Evaluation.

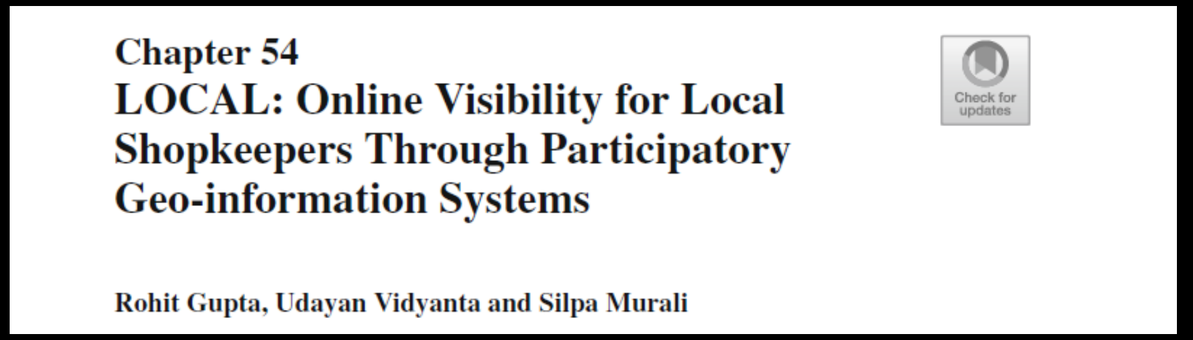

PHASE 1: MARKET IDENTIFICATION

THE INDIAN E-COMMERCE BOOM

The landscape is shifting rapidly. By 2040, nearly 95% of purchases are expected to be online. For a brand like Zudio, this represents a massive untapped opportunity.

- **Growth:** Market to reach USD 200 Billion by 2026.
- **Competitors:** Amazon, Flipkart, Myntra dominate via superior UX.
- **Correlation:** High UX quality directly correlates with market ranking.
- **Gap:** Zudio is a retail giant with limited digital footprint.

INTERVIEW QUESTIONS

UNSTRUCTURED INTERVIEW

1. How do you currently shop from Zudio, and how often do you visit their physical stores?

2. Have you ever wished Zudio had a proper online shopping platform? Why or why not?

3. What challenges do you face when trying to access Zudio products without visiting a physical store?

4. How important is fast delivery when choosing to shop from a fashion brand online?

5. Would you prefer buying from a Zudio mobile app instead of visiting the store? Explain your preference.

6. What features would you expect from a Zudio mobile app if it existed?

7. How likely are you to use a “Try Me / Virtual Try-On” feature to check outfits at home?

8. What concerns would you have about using a digital try-on experience in a fashion app?

9. How do you usually discover new arrivals or offers from fashion brands?

10. What issues do you face with existing fashion e-commerce apps (e.g., Myntra, Ajio, H&M)?

11. How important is a store locator feature for you when a brand has both online and offline presence?

12. How smooth do you expect the checkout process to be in a mobile app? What annoys you the most in current apps?

13. If Zudio offered fast delivery (1–2 days), how would it impact your usage of their app?

14. What type of product information do you rely on the most while purchasing clothes online (size guide, reviews, material info, photos, try-on)?

15. What would make you choose Zudio’s app over multi-brand marketplaces like Myntra or Ajio?

WALL OF INFORMATION

Every time I want to check new arrivals, I need to physically go to the store. Very inconvenient	“I live far from any Zudio branch, so honestly I rarely buy from them even though I want to	I don’t understand why in 2025 they still don’t have a proper app.	Fast delivery would be a huge win. I’d shop more often	Store locator is absolutely needed. I never know which store has what stock	If there was a digital try-on feature I would love it. Choosing sizes is hard for me	Try-on might be fun, but I don't know how accurate it would be.	Zudio’s Instagram looks nice but there’s no link to buy anything	I don’t like big apps that take too much storage
I always check Myntra or Ajio instead because they’re easy. Zudio needs that level of convenience	I have to take the bus 40 minutes just to check if something is in stock. Very tiring	Checkout should be super fast. I hate apps that make me fill a million details	I would like COD, fast delivery, easy return. That’s basic for me.	I usually want to see fabric details before buying. Zudio never gives that info.	Every time I want to check new arrivals, I need to physically go to the store. Very inconvenient	Sometimes I want to quickly see prices, but only way is going to the store	Would love curated looks or outfit suggestions. I get confused what to pair with what	I shop mostly online these days because I don’t have time to visit shops
The store is always crowded. App would save me time.	I have to take the bus 40 minutes just to check if something is in stock. Very tiring	I’m tired of going to the trial room, I don’t have patience. Try-on at home sounds cool	Size guide should be accurate; Zudio sizes are inconsistent for me	The physical store near me is very small, so not many options.	Every time I want to check new arrivals, I need to physically go to the store. Very inconvenient	I want to check availability before going — is this shirt even in the store?	Myntra is expensive. Zudio is affordable but inaccessible.	Payment failures stress me. Need reliable checkout.
If the app showed discounts first, I would definitely use it	I often forget what I saw in-store. Wish I could save items	Their website now is kind of useless. Just photos and info, no shopping.	I don’t know why they don’t launch e-commerce; they’re losing money	I usually want to see fabric details before buying. Zudio never gives that info.	Reviews are important for me before buying clothes online	Sometimes I want to quickly see prices, but only way is going to the store	I like simple UIs. Too much clutter puts me off	I want notifications about restock of items I liked.

AFFINITY MAPPING

Accessibility Gap

- Zudio has such good stuff but I can’t buy anything online
- Every time I want new arrivals, I need to visit the store
- I live far from Zudio so I rarely shop even though I want to
- In 2025 still no app? Strange
- Their website is useless, only photos.
- I don’t know why they don’t launch e-commerce; they’re losing money

Store Limitations

- I have to travel 40 minutes just to check stock
- The store near me is small, not many options
- Store is always crowded. App would save me time
- I want to check availability before going — is this shirt even in the store?
- Sometimes I see something in-store and forget it later.

Desire for Fast Delivery

- Fast delivery would be a huge win.
- If delivery is slow, I won’t use the app.
- 2–3 days max
- COD, fast delivery, easy return — basic for me

Frictionless Checkout Expectations

- Checkout should be super fast
- I hate filling a million details
- Payment failures stress me.
- I don’t like when an app forces login immediately.

Digital Try-On

- A digital try-on would help me find my size
- Try-on might be fun but accuracy matters.
- Going to trial rooms is tiring; try-on at home sounds cool
- Zudio sizes are inconsistent; try-on would help

AFFINITY MAPPING

Product Information Needs

- I rely on fabric details a lot.
- Size guide should be accurate
- I want to see real colors, many apps show wrong colors
- I want reviews before I buy something

App Features Users Expect

- Store locator is needed
- Fast delivery, easy return
- Lightweight app, not too heavy.
- Curated looks or outfit suggestions please
- Save items I like.
- Simple UI, no clutter.
- Notifications about restock
- Filter by trending, new arrivals, most bought

Discovery & Social Influence

- I find things on Instagram but can’t buy instantly.
- Zudio’s Insta is good but no link to buy
- I check Myntra/Ajio because they’re easy.
- Myntra is expensive but accessible; Zudio is affordable but inconvenient.

Family/Kids Shopping Needs

- Zudio’s kidswear is good; wish I could order online.
- Want to quickly see prices before going to store.

COMPETITOR ANALYSIS

Westside

- **Segment:** Mid-value curated fashion
- **Strengths:** Trendy in-house labels, better quality, strong store aesthetics
- **Weaknesses:** Higher prices, not ultra-budget
- **Relation to Zudio:** Indirect competitor; aspirational alternative

Trends

- **Segment:** Value fashion
- **Strengths:** Huge store network, low prices, strong private labels
- **Weaknesses:** Inconsistent quality and store experience
- **Relation to Zudio:** Direct price + mass-market competitor

max

- **Segment:** Value fashion
- **Strengths:** Good quality for price, strong Western wear, wide assortment
- **Weaknesses:** Slightly higher prices, slower trend updates
- **Relation to Zudio:** Targets same youth + family audience

Pantaloons

- **Segment:** Affordable to mid-value lifestyle
- **Strengths:** Strong ethnic wear, wide mix, trusted brand
- **Weaknesses:** Higher prices than typical value fashion
- **Relation to Zudio:** Partial overlap in casual/ethnic wear

User Persona 1:The Budget-Conscious Student

- Name: Priya, 21
- Location: Coimbatore (Tier 2 city)1
- Occupation: College student (Design major)
- Income: ₹15,000/month (part-time income + allowance)
- Demographics: Female, unmarried, lives in hostel
- Tech Behavior: Extremely tech-savvy, constantly on Instagram/social media for trend research
- **Behavior:** Impulsive, Visual-First, Value-Conscious.
- Pain Points:
  1. Limited budget but wants to stay trendy for college events
  2. Wastes time visiting stores only to find sizes unavailable
  3. Can't browse collections during late-night study breaks

     Wants to save favorites but has no wishlist option
- App Use Case: Would use app to check new arrivals, save outfits for weekend shopping trips, locate nearest store, and book trial room slots to avoid long queues

User Persona 2: The Time-Starved Professional

- Name: Rajeesh, 29
- Location: Nagpur (Tier 2 city)
- Occupation: IT professional
- Income: ₹45,000/month
- Demographics: Male, married, works 9-6 job
- Tech Behavior: Uses apps for everything—groceries, food, banking; expects seamless digital experiences
- Pain Points:
  1. Only has weekends to shop but stores are crowded with long billing queues
  2. Can't check stock availability before driving to store
  3. Wife asks him to pick specific items but he doesn't know what's available
  4. Frustration with wasted trips when products are out of stock
- App Use Case: Would check inventory online during lunch breaks, reserve items for quick weekend pickup, get notifications about restocks, and navigate to stores with specific products in stock

User Persona 3: The Family Shopper

- Name: Kavita, 36
- Location: Jaipur (Tier 2 city)
- Occupation: Homemaker
- Income: Household income ₹65,000/month
- Demographics: Female, married with 2 kids (ages 8 and 12)
- Tech Behavior: Moderate digital user; comfortable with WhatsApp, YouTube, and shopping apps
- Pain Points:
  1. Shops for entire family—needs to coordinate sizes and preferences
  2. Kids grow fast; frequently needs to check what's in stock before visiting
  3. Seasonal shopping is stressful without planning tools
  4. Can't remember which Zudio location had better kids' section
- App Use Case: Would browse collections at home, create wishlists for each family member, compare nearby store inventories, and plan shopping trips during school hours to avoid crowds

PHASE 2: DEFINING THE PROBLEM

THE "ACCESSIBILITY GAP"

Zudio's current model emphasizes physical stores. This excludes customers outside store catchments and fails to capture digital-first engagement.

Problem Statement:

"Users browse in-store but lack knowledge of stock availability, while remote users cannot access the brand at all."

THE INNOVATION SOLUTION

A modular mobile app prioritizing fast discovery, store-locator functions, and frictionless checkout.

Key Objectives:

- **Inventory Transparency:** Real-time store stock.
- **Omnichannel:** Click-and-Collect integration.
- **Trust:** Authentic sizing and photo verification.

PHASE 3: IDEATION (TRIGGER WORDS)

TRUST

Trigger:

Authenticity

Photo verification of packed items before dispatch to ensure quality.

SPEED

Trigger:

Frictionless

Guest Checkout & UPI Integration. Remove the "Login Wall" barrier.

LOCAL

Trigger:

Accessibility

localized store inventory visibility.

PHASE 3: IDEATION (SCAMPER)

S.C.A.M.

- **Substitute:** Replace "Shipping Only" with "Ship-from-Store" to utilize offline inventory.
- **Combine:** Merge "Online Browsing" with "Offline Sizing" via Tailor-assisted measurements.
- **Adapt:** Use "Event-Based Recommendations" (Festivals, Birthdays) to drive impulse buys.
- **Modify:** Change the measurement options with a full on outfit checket feature.

P.E.R.

- **Put to another use:** App acts as an in-store inventory checker for physical shoppers.
- **Eliminate:** Eliminate mandatory login at the beginning allow full browsing before sign up.
- **Reverse:** Start with "Find Store" instead of "Checkout" for local users.

Innovation Highlight:

Mix and Match for perfect fit reduces returns and builds trust.

PHASE 4: WIREFRAMING

PHASE 5: HEURISTIC EVALUATION

Visibility of system status

Users always know what’s happening: location (“Deliver to Mumbai”), outfit analysis (“85% Match”), and cart state (“3 items”).

Match with the real world

The Mix & Match studio copies how people actually dress (top–bottom–shoes).

User control and freedom

Users can easily edit their profile and adjust or remove cart items without breaking the flow.

Consistency and standards

Screens follow common e-commerce patterns and a uniform visual style for cards, type, and buttons.

PHASE 5: HEURISTIC EVALUATION

Aesthetic and minimalist design

Large product images, clean cards, and whitespace keep attention on clothes, not interface clutter.

Recognition over recall

Image-heavy selection sheets let users choose visually instead of remembering product names.

Flexibility and efficiency

Shortcuts like “Add All” and list/grid view toggles support both power users and different browsing styles.

FUTURE ROADMAP

1

PHASE 1

MVP (Minimum Viable Product) App Focus: Discoverability

2

PHASE 2

More user texting

3

PHASE 3

User feedback

4

PHASE 4

Loyalty & Innovation Features
