crumbs

“Good food deserves a second chance.”

FOOD RESCUE APP – UX/UI CASE STUDY PRESENTATION

Aleesha Amokh Emelyn Shikha

About Us

A food rescue platform connecting unsold food with people who need affordable meals.

Designed for: Students, young professionals, hostel residents, and conscious consumers.

Core Idea: Reduce food waste by helping cafes, bakeries, and restaurants sell surplus food at affordable prices through time-based rescue drops, mystery boxes, and gamified rewards.

crumbs

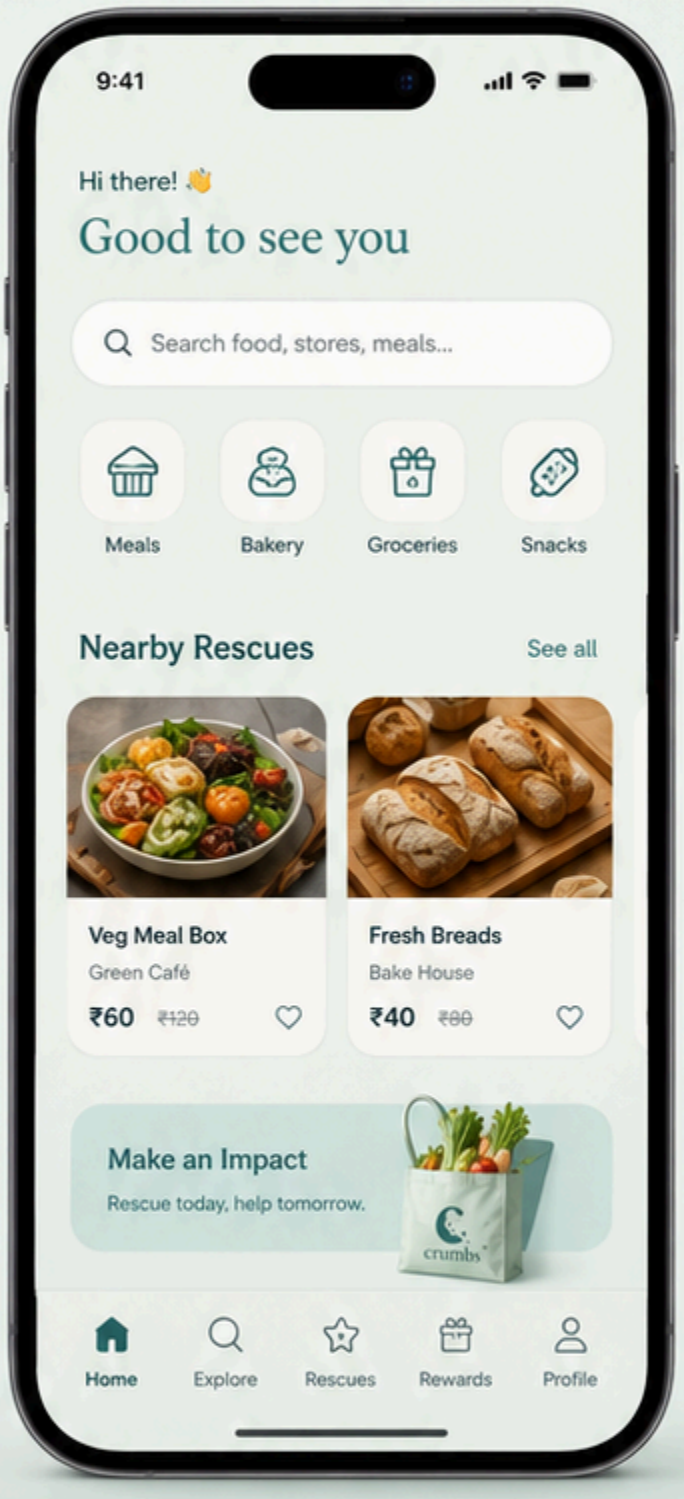
Good Food Deserves
a Second Chance

Rescue today.
Feed tomorrow.

Rescue Food
Save surplus food from nearby stores.

Affordable Deals
Get great food at low prices.

Late Night Snacks
Find deals on late night hunger savers.



Expiring Products
Prevent food waste by rescuing items near expiry.

Budget Meals
Delicious meals that fit your pocket.

Rewards
Earn points & unlock exciting rewards.

Surplus Food
Extra food from events & partners, rescued.

Smart Savings
Save more, waste less, live better.

Together, we can make a difference.

Good for you.
Good for community.
Good for planet.

RESCUE GOOD FOOD.
SAVE MORE.

Introduction

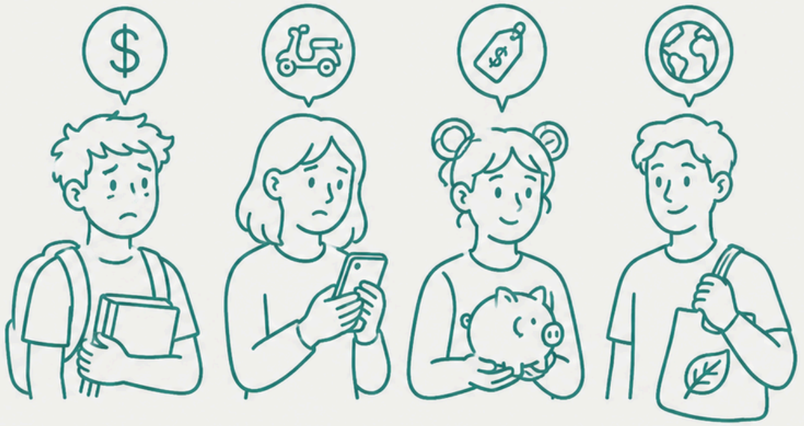
The Problem

Every day, cafes, bakeries, and restaurants throw away perfectly edible food due to:

- Excess production
- Unsold inventory
- Closing-time leftovers
- Short shelf life
- Lack of redistribution systems

At the same time:

- Students struggle with food affordability
- Hostel residents depend on expensive food delivery
- Young users seek budget-friendly options
- Consumers are becoming more sustainability conscious



This creates a major disconnect between food waste and food accessibility.

Ideations

Initial Thought Process

The project began by observing how cafes and bakeries throw away fresh unsold food at the end of the day while students and young users constantly search for affordable meals.

The goal was not only to **reduce food waste** but also to make the experience **emotionally engaging and exciting** rather than **guilt-driven.**

Questions Explored During Ideation

- How can food rescue feel exciting instead of depressing?
- How can surplus food become desirable?
- How might students benefit from food rescue systems?
- How can sustainability become part of daily behaviour?
- What would make users repeatedly open the app?
- How can bakeries easily upload unsold products?
- How can urgency increase order conversion?
- How can users emotionally connect with rescuing food?

Ideations

Early Idea Directions

01 Discount-Based Food Rescue

Simple discounted food listings from nearby cafes and bakeries.

Problem:
Functional but emotionally weak.

02 Sustainability Tracking

Users could see:

- Food rescued
- Money saved
- Environmental impact

Result:
Added emotional satisfaction.

03 Mystery Rescue Boxes

Surprise food bundles at lower prices.

Result:
Made the experience playful and exciting.

04 Campus-Based Offers

Student-exclusive rescue drops near colleges and hostels.

Result:
Solved affordability for a specific target audience.

05 Gamification

Adding:

- Rescue streaks
- Points
- Badges
- Rewards

Result:
Encouraged repeated engagement and habit formation.

Ideations

Final Ideation Outcome

CRUMBS

Rescue Food. Save Money. Create Impact.

A gamified food rescue platform that combines:

Affordable Surplus Food
High-quality food at lower prices from trusted cafes and bakeries.

Student-Focused Offers
Exclusive discounts and campus-based drops made for students.

Real-Time Bakery Drops
Live updates on unsold food available near you before it's too late.

Mystery Boxes
Surprise food bundles that make every rescue exciting and delightful.

Sustainability Tracking
See the food, money, and environmental impact you create with every rescue.

Reward Systems
Earn points, build streaks, unlock badges, and get exciting rewards.

CRUMBS is not just an app.

It's a movement toward a more sustainable, affordable, and joyful future.

Scamper Method

A creative thinking framework that helped shape a gamified food rescue platform.

SCAMPER Element	Guiding Question	Idea Direction	How it Shaped CRUMBS
S Substitute	What can we substitute in the existing food consumption process?	• Substitute food waste with affordable surplus meals. • Replace guilt-driven messaging with excitement and rewards.	Made food rescue exciting, affordable and desirable instead of guilt-focused.
C Combine	What can we combine to create more value?	• Combine affordability + sustainability + gamification. • Combine real-time bakery drops + student offers + rewards.	Created a unique ecosystem that connects users, bakeries and the planet.
A Adapt	What can we adapt from other industries or behaviours? Loyalty programs, gaming streaks, flash sales	• Adapt gaming elements like streaks, points, badges. • Adapt flash sale urgency from e-commerce.	Gamification, limited-time offers and streaks drive habit and repeated engagement. M Modify	What can we modify to improve the experience?	• Modify the app to show real-time availability and pick-up times. • Modify listings to be visually appealing and easy to act on.	Real-time updates, beautiful UI and urgency improve trust and conversions.
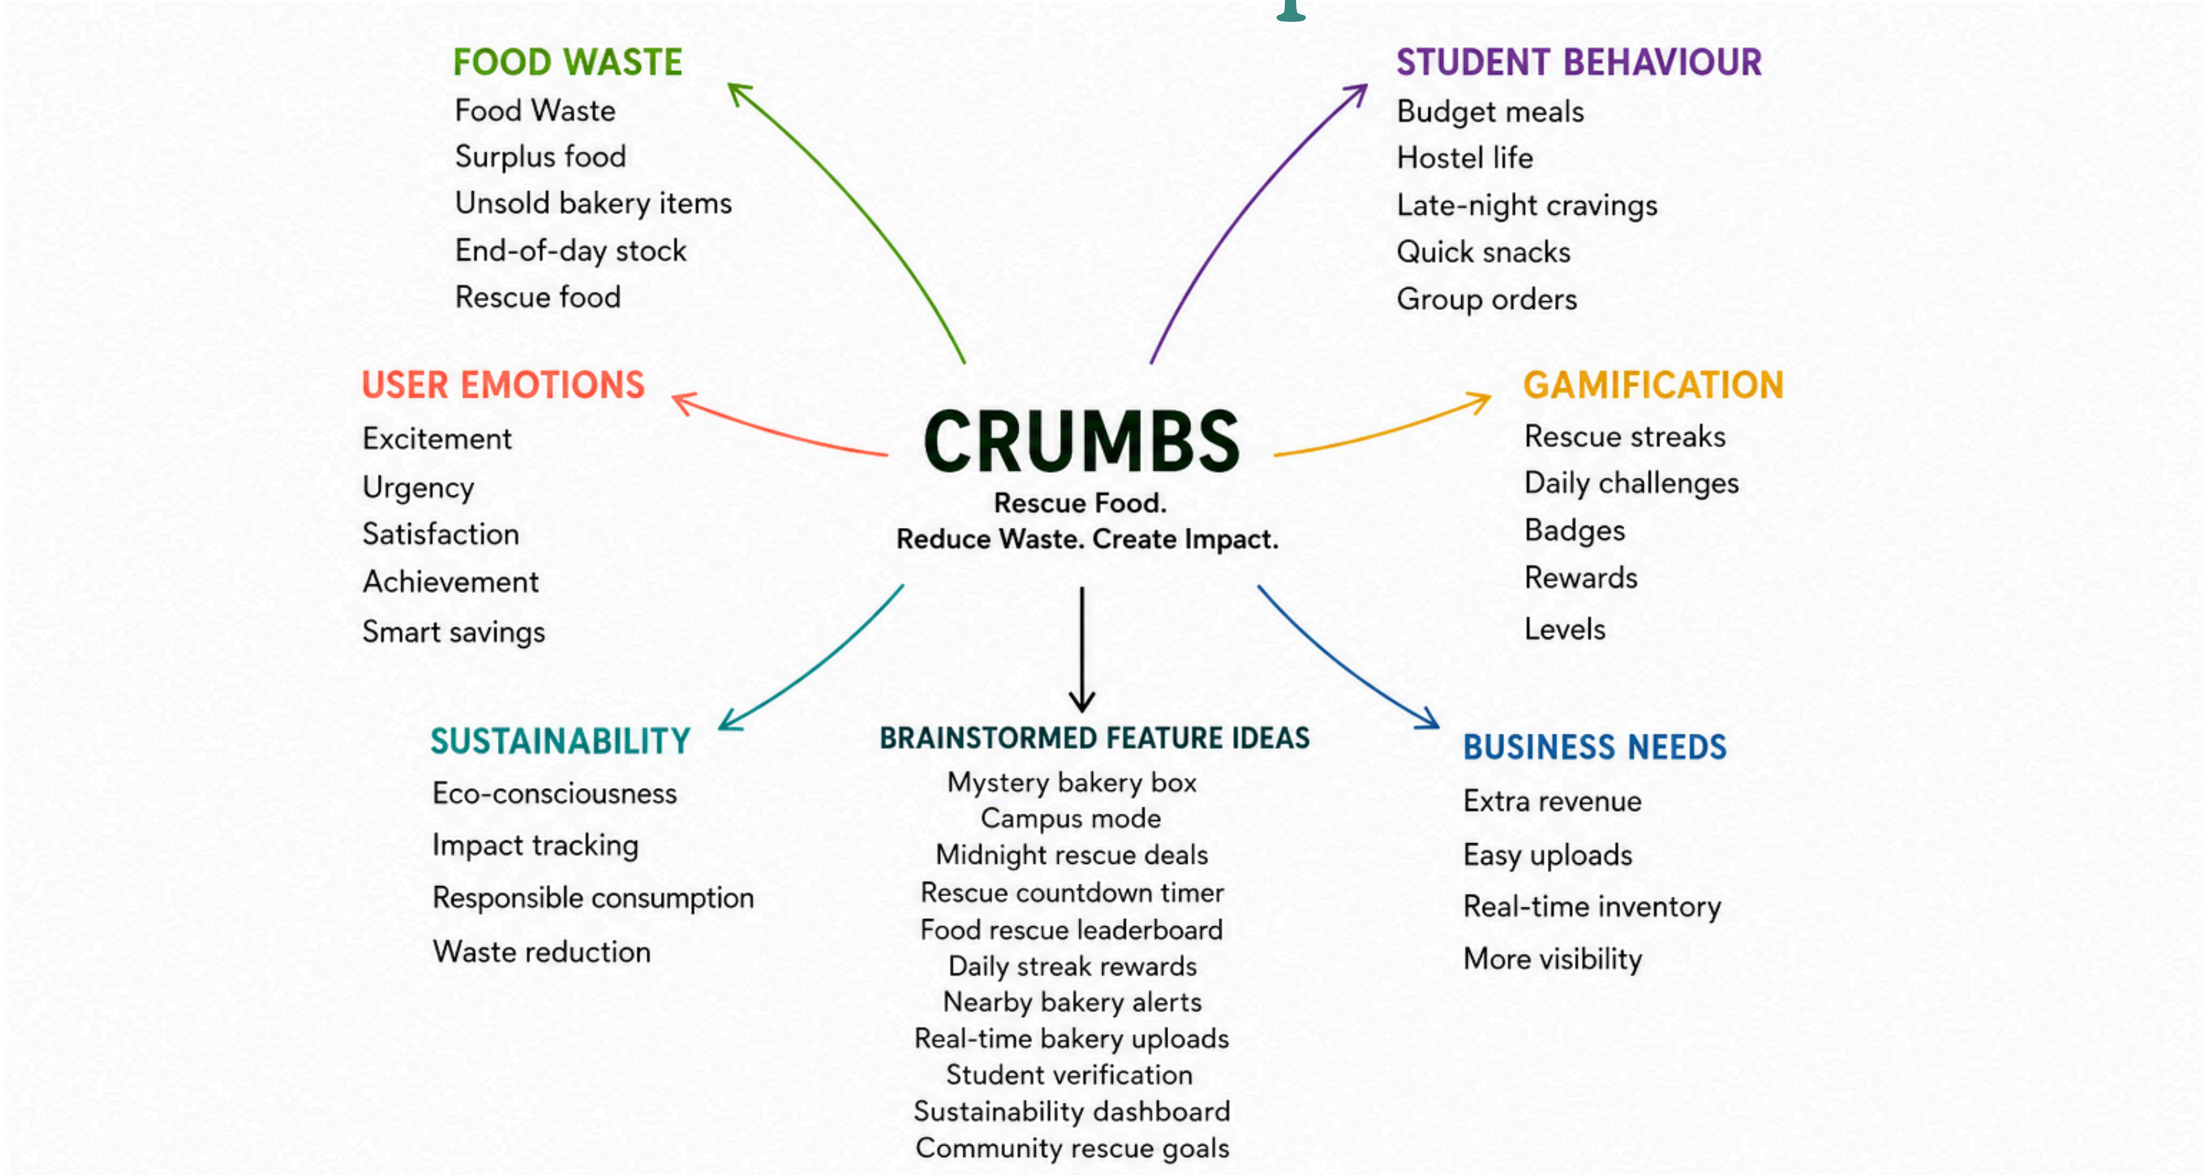
P Put to another use	How can we put surplus food to another use?	• Turn unsold food into mystery boxes. • Offer group rescue packs for sharing.	Mystery boxes and group offers reduce waste while making the experience fun and social.
E Eliminate	What can we eliminate to simplify or increase impact?	• Eliminate food waste. • Eliminate long delivery times and extra delivery fees by focusing on pick-up.	Better for the planet, cheaper for users, simpler and faster experience.
R Reverse / Rearrange	What can we reverse or rearrange?	• Reverse the flow: instead of food going to waste, it reaches users in time. • Rearrange priorities: profit + planet + people.	Built a system where everyone wins – bakeries earn, users save, and the environment benefits.

Mindmap



FOOD WASTE
Food Waste
Surplus food
Unsold bakery items
End-of-day stock
Rescue food
STUDENT BEHAVIOUR
Budget meals
Hostel life
Late-night cravings
Quick snacks
Group orders

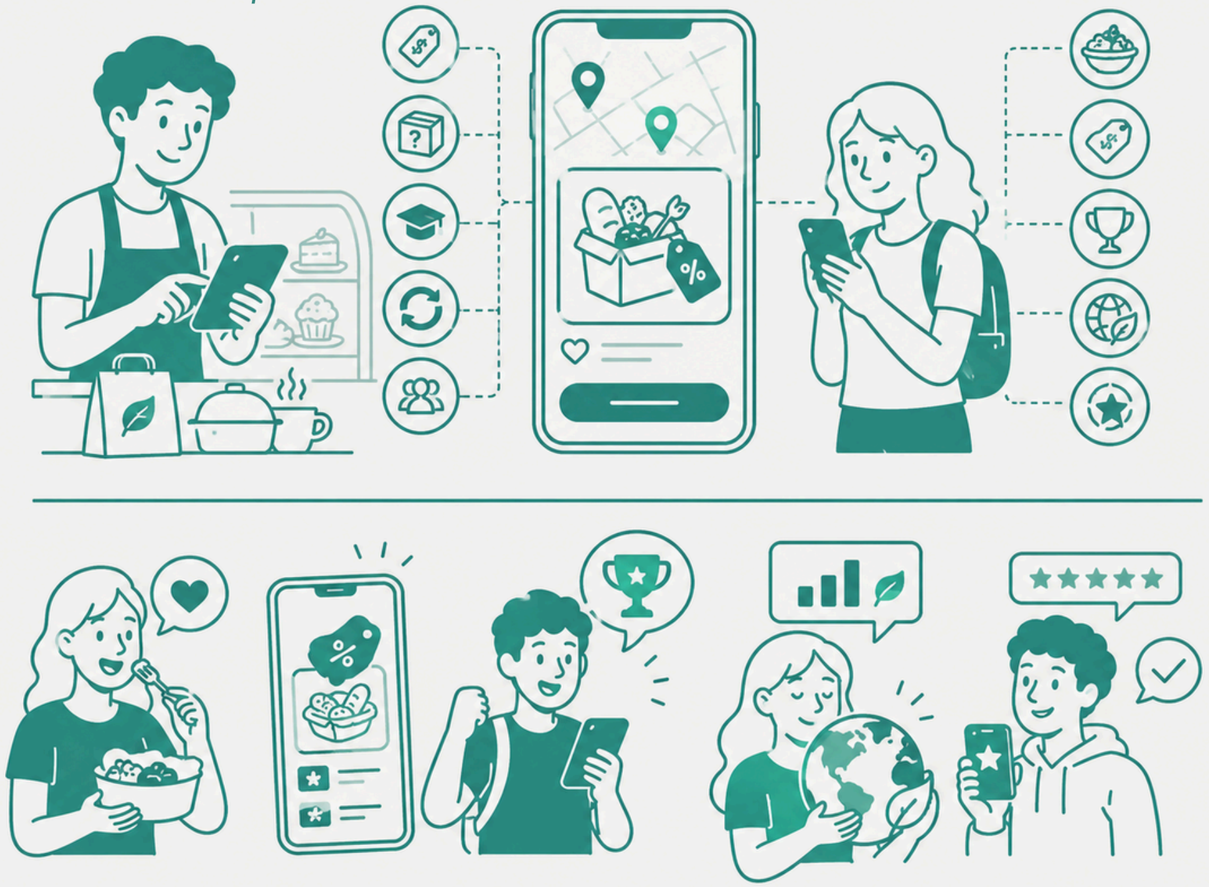
Project Overview

What is Crumbs?

Crumbs is a mobile application that allows users to discover discounted surplus food from nearby cafes, bakeries, and restaurants.



Instead of wasting edible food, businesses can:

- Upload rescue deals
- Sell surprise/mystery boxes
- Create campus-specific offers
- Reduce wastage
- Increase customer reach

Users benefit through:

- Affordable meals
- Daily deals
- Gamified rewards
- Sustainability tracking
- Rescue streaks and points

Target Audience

Primary Users

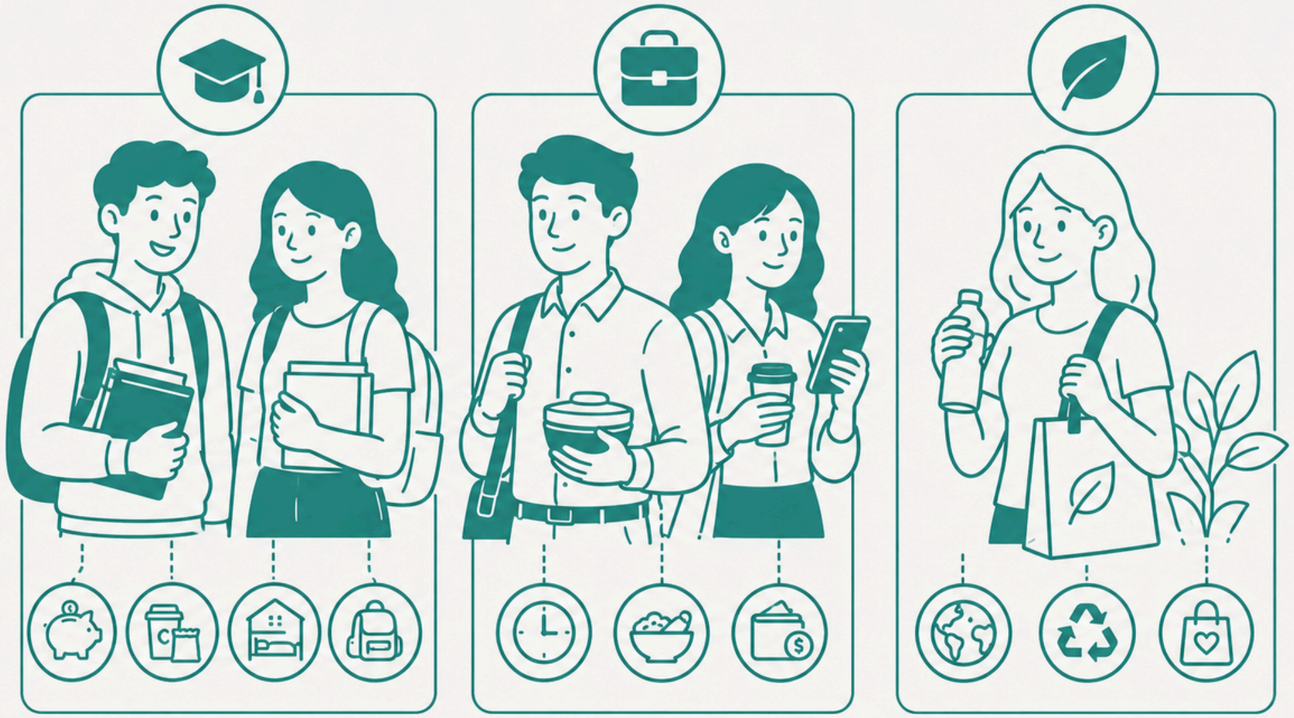
- Students
- Hostel students
- College-going users
- Budget-conscious consumers
- Frequent snack buyers

Young Professionals

- Office workers
- Working individuals living alone
- Users looking for quick affordable meals

Sustainability Conscious Users

- Eco-conscious consumers
- Minimal waste lifestyle followers
- Ethical buyers



Demographics

AGE GROUP

18–30 years

GENDER

All genders

LOCATION

Urban and
semi-urban areas

INCOME RANGE

- Students
- Lower to middle income users
- Young salaried professionals

BEHAVIOUR PATTERNS

- Price sensitive
- Influenced by convenience
- Emotionally responsive to rewards
- Interested in saving money
- Uses mobile apps regularly

LIFESTYLE

- Fast-paced routines
- Food delivery users
- Frequent cafe visitors
- Digitally active consumers

Food Waste Management Market Size by Waste Type, Process, Application, End-User, Region, Industry-Wide Analysis, Competitive Landscape Assessment & Long-Term Forecast to 2032

5.8% CAGR (2025-2032)

47.73 USD Bn. MARKET SIZE

330 REPORT PAGES

135 MARKET TABLES

OVERVIEW

The **Food Waste Management Market** size was valued at USD 47.73 Billion in 2024 and the total Food Waste Management revenue is expected to grow at a CAGR of 5.8% from 2025 to 2032, reaching nearly USD 74.94 Billion.

Key Findings

Users are highly price sensitive
Students prioritise affordability over brand loyalty.

Visual appeal affects food decisions
People are more likely to purchase if food visuals look fresh and premium.

Users enjoy gamified experiences
Reward systems increase repeat engagement.

Time-limited deals create urgency
Countdown timers and scarcity improve conversions.

Sustainability messaging increases emotional attachment
Users feel positive when their actions contribute to reducing waste.

Competitor Analysis

Feature	Crumbs	Too Good To Go	Swiggy/Zomato	FlashFood
Food Rescue Focus	Yes	Yes	No	Yes
Mystery Boxes	Yes	Yes	No	No
Student Offers	Yes	No	Limited	No
Gamification	Yes	Minimal	No	No
Rescue Streaks	Yes	No	No	No
Sustainability Tracking	Yes	Limited	No	Yes
Emotional UX	Strong	Medium	Low	Low
Community Feeling	Yes	Minimal	No	No

Primary Research

Questions Explored

- How often do users order food?
- What affects food purchasing decisions?
- Do users care about sustainability?
- What motivates repeated app usage?
- Would users buy leftover food if quality is trusted?

Wall Of Information

"If I can get bakery food cheaper at night, I would definitely buy it."

"I hate seeing good food wasted."

"Students always search for affordable food options."

"Mystery boxes sound exciting because you don't know what you'll get."

"I'd use it more if there were rewards and streaks."

"If the app shows how much food I rescued, I'd feel good using it."

"Late-night bakery drops would be useful near campuses."

"I trust cafes more than random sellers."

"Discounts combined with sustainability make the idea more attractive."

"Most bakeries throw away food at closing time even when it still looks fresh."

"Limited-time deals make me order faster."

"I usually spend too much money on snacks during college hours."

"Students usually wait for discounts before ordering food online."

"I would definitely buy leftover food if it's from a trusted cafe."

"Food delivery apps feel expensive for everyday use."

"Sometimes I just want a cheap snack late at night."

"Mystery boxes make the experience feel fun instead of cheap."

"I like the idea of saving food instead of wasting it."

Survey Findings

1 Would you buy food at a discounted price if it is still fresh but close to expiry?

- Yes – 78%
- No – 22%

2 Do you feel bad when perfectly good food gets wasted in cafes or bakeries?

- Yes – 91%
- No – 9%

3 Would you use an app that helps reduce food waste while saving money?

- Yes – 87%
- No – 13%

4 Are student discounts important while ordering food online?

- Yes – 84%
- No – 16%

5 Would you try a mystery food box if it was offered at a lower price?

- Yes – 76%
- No – 24%

6 Do limited-time offers make you more likely to place an order quickly?

- Yes – 81%
- No – 19%

7 Would you trust surplus food from known bakeries or cafes?

- Yes – 73%
- No – 27%

8 Do reward points and streaks increase your interest in using an app regularly?

- Yes – 79%
- No – 21%

9 Would you prefer pickup orders if it meant getting food at a much cheaper rate?

- Yes – 68%
- No – 32%

10 Do you think food rescue apps can positively impact the environment?

- Yes – 89%
- No – 11%

11 Would you recommend a food rescue app to your friends if the experience was good?

- Yes – 86%
- No – 14%

12 Would you be interested in campus-exclusive food rescue offers for students?

- Yes – 83%
- No – 17%

User Persona

Arjun Menon

26 Years Old | Young Professional

Age	Status	Location
26	Young Professional	Urban

BEHAVIOUR

- Uses food apps regularly
- Prefers fast pickup
- Interested in eco-conscious brands

GOALS

- Reduce unnecessary spending
- Eat conveniently after work
- Support sustainable practices

FRUSTRATIONS

- Overpriced evening meals
- Limited late-night options
- Repetitive food choices

User Scenario

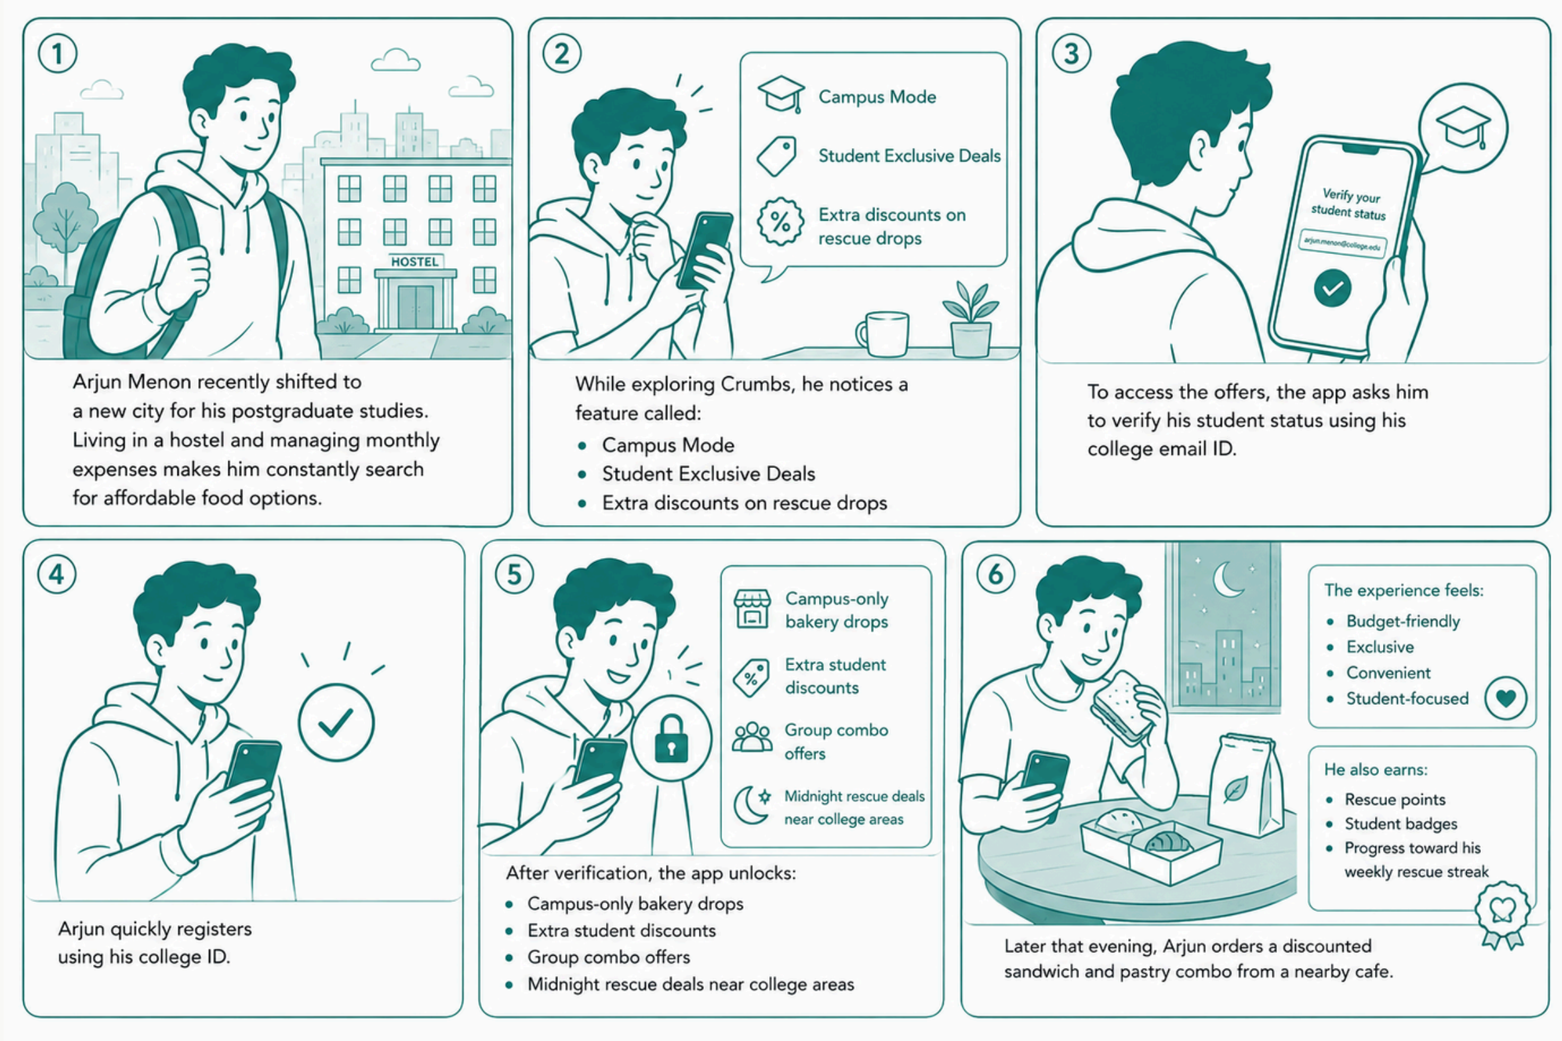
Scenario: Unlocking Student Offers

Arjun Menon recently moved to a new city for his postgraduate studies and often looks for affordable food options while managing hostel expenses.

While exploring Crumbs, he discovers Campus Mode with student-exclusive rescue deals. To unlock the offers, he verifies his account using his college email ID.
After verification, he gains access to:

- Campus-only bakery drops
- Extra student discounts
- Group combo offers
- Midnight rescue deals
-

Later, Arjun orders a discounted sandwich and pastry combo from a nearby cafe while earning rescue points, student badges, and progress toward his rescue streak.



User Persona

Aanya Thomas

20 Years Old | College Student

Age	Status	Location
20	College Student	Urban

BEHAVIOUR

- Orders food frequently
- Uses mobile apps daily
- Likes aesthetic interfaces
- Shares deals with friends

GOALS

- Save money on food
- Find quick snacks after classes
- Discover affordable cafes

FRUSTRATIONS

- Expensive food delivery
- Wasted bakery food
- Limited student-friendly deals

User Scenario

Scenario: Late Evening Rescue Drop

Aanya finishes college classes at 7:30 PM. She opens Crumbs while travelling back to her hostel.

The app shows:

- A nearby bakery rescue drop
- 60% off pastries
- Only 3 boxes left

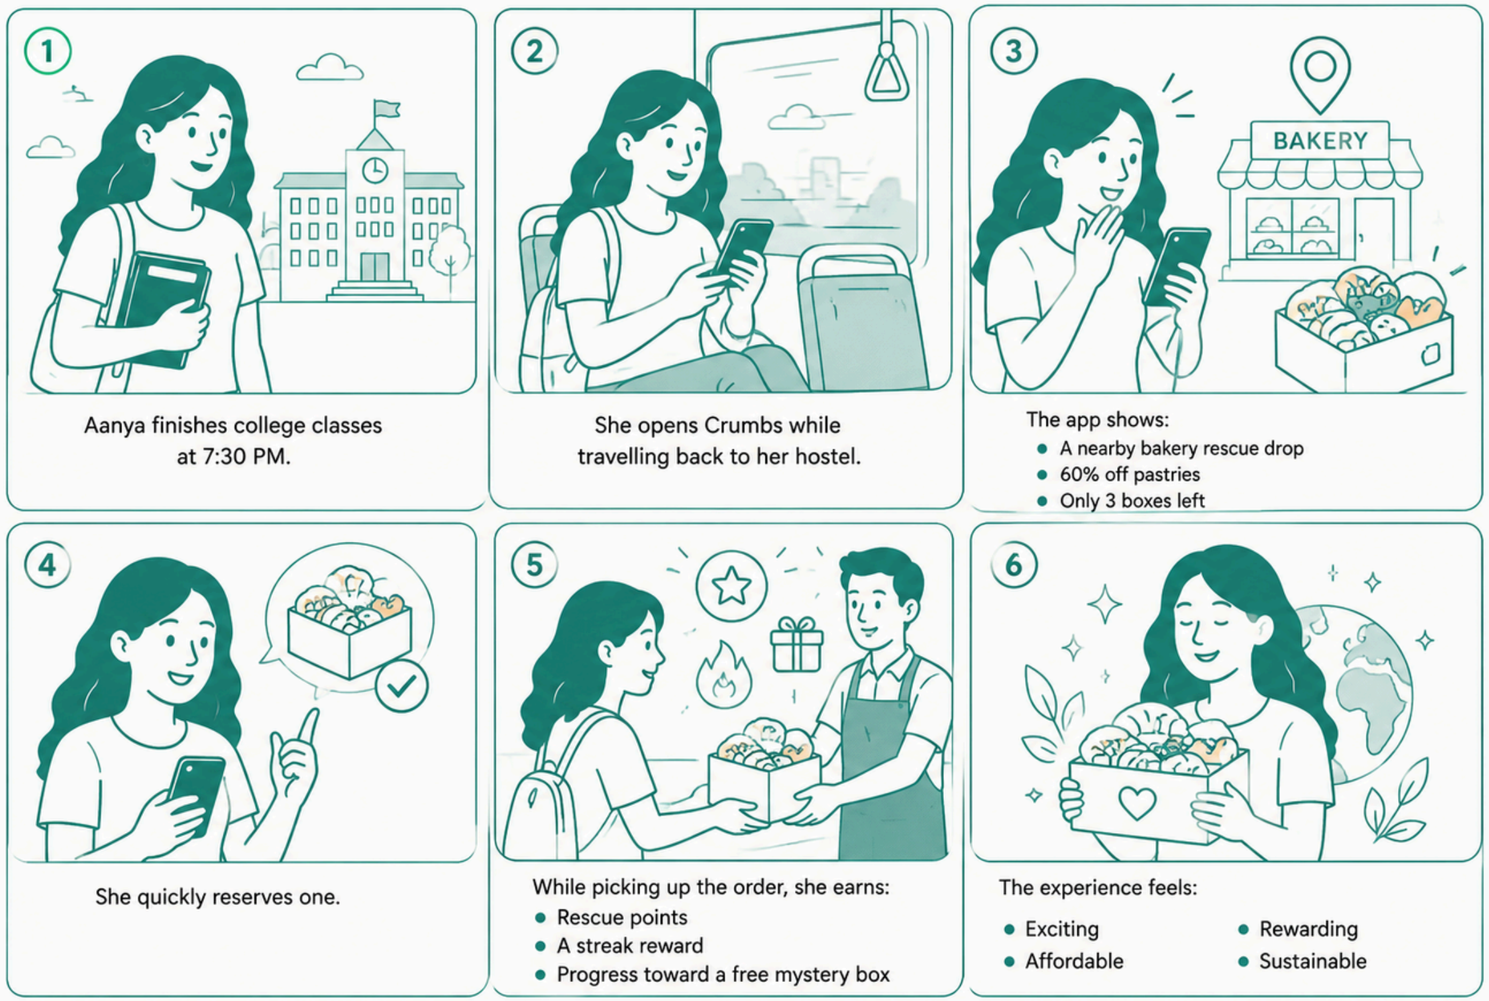
She quickly reserves one.

While picking up the order, she earns:

- Rescue points
- A streak reward
- Progress toward a free mystery box

The experience feels:

- Exciting
- Affordable
- Rewarding
- Sustainable



User Persona

Neha

Bakery Owner

34 Years Old | Bakery Business Owner

Age	Occupation	Location
34	Bakery Business Owner	Urban

BEHAVIOUR

- Updates product stock daily
- Takes real-time product photos
- Prefers quick order management
- Wants simple business tools

GOALS

- Reduce daily food wastage
- Sell unsold bakery items before closing time
- Reach nearby customers quickly
- Increase additional revenue

FRUSTRATIONS

- Throwing away fresh products daily
- Loss from unsold inventory
- Limited visibility during late evenings
- No easy platform for surplus food sales

User Scenario

Scenario: Listing Rescue Drops

At the end of the day, Neha notices several fresh pastries and sandwiches are still unsold in her bakery.
Instead of wasting them, she opens Crumbs using her Business Login.

She uploads:

- Real-time images of the products
- Quantity available
- Discounted prices
- Pickup timing

Within minutes, nearby users discover the rescue drop on the app.
Neha starts receiving orders in real time and prepares the rescue boxes for pickup.

Thank You
